Are You Staying Warm?!

It is bitterly cold out there. If it's going to be so cold, it should be snowing! Oh well, I guess that's what we get for living in the High Desert. Stoke up the fire and keep a mug of hot chocolate on hand.

Be sure to note our new Repair Services and Online Backup, we have responded to your

requests for additional services from a trusted source. Let us know if there is anything else that you need. We will analyze what is available and either incorporate it into our offerings or refer you to a trusted source. You can always reach us @ 884-3202 or we will call you right back.

Online Backup Service

In addition to our new repair center that we just instituted at your overwhelming insistence, we also have an Online Backup Server.

We can provide you 10 gigs of offsite server space for just \$6.95/mo and the first month is free. If you have years of pictures you can't lose or a small business that needs a secure backup every day or every week, you no longer need to feel unprotected or taken advantage of.

Unlike other services of this type, Pyramid.Net's Cloud sends

your data to two geographically distant locations giving you backup security beyond the competition. Our backup software also allows you to backup your data to your own local drives automatically. The security and convenience can't be beat!

Call us @ 884-3202 for either our backup service or repair work. We are offering an introductory rate for a Computer Tune-Up for \$83.30 for all Pyramid.Net customers through Jan. 15, 2012. This service includes cleaning, servicing and any maintenance that needs to be done.

Spam

Email is convenient, fast and relatively easy - when it works. However, all those attributes also apply to hackers and Spammers - it's easy for them to poison emails and make it so that your emails don't work right.

Most servers have restricted access in order to prevent just that kind of poison. Don't try to send out multiple emails at once as outside servers assume that if you send out more than 10 pieces at a time - you are a Spammer.

It is important to purchase a

Virus & Spam blocker for your computer. We can provide you additional coverage for your emails @ \$.95 per month through Postini. They are a professional Fortune 500 product that many companies use. Postini provides you full access and allows you full control over black and white lists as well as viewing those emails that it catches. Remember because blockers have to wait until there is a problem to come up with a solution, no blocker is perfect.

Moving?

If you are planning to move and have DSL with us, you need to let us know as soon as you call AT&T with the move order so that we can plan a smooth transition for you and minimize the time when your Internet will be down. If you cannot afford to be offline, you need to order a second phone line (that we can

transfer later) for immediate ordering.

We are forced to use AT&T's computer system to place DSL orders and move orders often don't proceed as smoothly as we expect. Please call us as soon as you know specifics about your move.

Services that Pyramid.Net Offers:

- DSL & Dialup & Postini
- Online Backup Service
- VOIP - Long Distant Calling Plans
- Custom Website Creation & Hosting
- Computer Tune-Up
